### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The drawings are objected to under 37 CFR 1.83(a) as failing to illustrate the welding, bonding, and clamping recited in claim 3.
2. The written description is objected to as being unclear and inconsistent with the drawings. Page 3 states that Figure 1 illustrates that outer sleeve 6 is above mouth 4 when the bag is in its inverted position, i.e., when the mouth is lowermost. However, Figure 1 illustrates the bag with the mouth uppermost and with the sleeve above the mouth. Clarification is required.
3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no enabling disclosure of an inverted bag having an outer sleeve extending above the mouth.
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims must be rewritten using idiomatic English. The phrases "in particular, folded" and "especially folding" render the claims indefinite because it is not clear whether folding is actually required. The phrase

Art Unit: 3727

"shaped on itself" is unclear. The phrase "for example" renders the claims indefinite because it is unclear whether the statement which follows is included in the claim.

There is no antecedent for "the edges" in claim 2. It is unclear what is meant by "a turned up flap extended by an outer envelope." There is no antecedent for "the close-together parallel edges of the outer envelope." How is something "determined without discontinuity?"

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Perron, United States Patent No. 5,108,195. To the extent that it can be determined what this claim requires, the bag disclosed by Perron is anticipatory.

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 3/1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Perron, United States Patent No. 5,108,195. It would have been obvious to one of ordinary skill in the art at the time the invention was made to seal the outer closure using a weld or a bond because welding and bonding are old, well-known and obvious.

11. The remaining patents are cited to show other, similar bags.
